ABSTRACT

Program operations from July 1, 1973 to June 30, 1975 are reported that deal with four Federal and four State programs of direct benefit to postsecondary education in Iowa. The current biennium has seen a 45 percent growth in State-funded financial assistance for Iowa postsecondary students. State funds invested in scholarships, grants, and medical loans totaled \$12,760,560. As of the fall of 1974, Iowa ranked tenth in per capita funding among the 39 states that had established comprehensive scholarship and grant programs. Student aid appropriations in these 39 states totaled \$457 million. Statistics are provided on the State Scholarship program; Iowa Tuition Grant Program; Iowa Vocational-Technical Tuition Grant Program; Iowa Medical Loan Plan; Construction Grants Program; Equipment Grants Program; Comprehensive Planning Grants Program; undergraduate enrollments; and total enrollments by institution. Provisions of the appropriate State statutes are quoted. (LBH)

The Honorable Robert D. Ray Governor of Iowa

The Honorable Arthur A. Neu Lieutenant Governor

The Monorable Dale M. Cochran Speaker of the House

Member of the Sixty-Sixth General Assembly

The Iowa Higher Education Facilities Commission respectfully submits this report on program operations during the biennium beginning July 1, 1973 and ending June 30, 1975.

On behalf of the Commission and staff, may I express our appreciation for the support which we have received from both the administrative and legislative branches of the Iowa state government in carrying out the responsibilities assigned to us.

Respectfully,

Keith S. Noah Chairman

KSN/tjb

PREFACE

The Higher Education Facilities Commission has administrative responsibility for four Federal and four State programs of direct benefit to postsecondary education in Iowa. The following report covers details on the operation of these programs during the 1973-75 biennium.

The current biennium has seen a 45 percent growth in State-funded financial assistance for Iowa postsecondary students. State funds invested in scholarships, grants and medical loans over the past two years totaled \$12,760,560, as compared to \$8,825,000 during the 1971-73 biennium.

As of the fall of 1974, Iowa ranked tenth in per capita funding among the 39 states which had established comprehensive scholarship and grant programs. Student aid appropriations in these 39 states totaled \$457 million.

The State-funded programs are summarized below:

The State of Iowa Scholarship Program, established in 1965, offers recognition to outstanding high school graduates and financial help, if needed, to attend the Iowa college the student selects. The \$625,000 appropriation for the 1973-75 biennium was supplemented with \$237,374 in Federal matching funds under the State Student Incentive Grant Program. During the past two years, state scholarships have aided 1,222 freshman and sophomore students with awards averaging \$550 a year toward tuition at either public or private Iowa postsecondary institutions.

The Iowa Tuition Grant Program, authorized in 1969, offers need-based grants to Iowa residents enrolled at private colleges and universities in the State. With a funding of \$12,000,000 for this biennium, the program has provided more than 13,000 individual grants of up to \$1,000 a year.

The Iowa Vocational-Technical Tuition Grant Program, which became effective in the fall of 1974, is designed to help students enrolled in career education courses at the Iowa area schools. The pilot year funding of \$40,000 provided 200 grants of \$200 each.

The Iowa Medical Tuition Loan Plan, which made cancellable loans to osteopathic and medical students who agreed to practice in Iowa, was discontinued at the close of the 1974 fiscal year. However, the Commission has a continuing responsibility for follow-up and collection of these loans

While the State programs expanded during the 1973-75 biennium, the Federal programs have declined in funding by approximately 45 percent.

The Construction Grants Program, authorized under Title I, Higher Education Facilities Act of 1963, has not been funded for the past two years. However, impounded funds in the amount of \$625,353 were released and made available to Iowa institutions in FY 1974.

The Equipment Grants Program, authorized under Title VI-A Higher Education Act of 1965, continued to provide grants totaling \$360,528 in FY 1974 for the purchase of classroom instructional equipment at lowar postsecondary institutions. The FY 1975 funding is still undetermined.

The Comprehensive Planning Grants Program, authorized under Title XII, Higher Education Act of 1965, as amended, provides funds for statewide educational planning to states which have established postsecondary education commissions in accordance with Section 1202 (a) of the Act. The report includes a bibliography

5

of studies carried out by the Commission, as well as a description of the planning project now in progress.

The State Student Incentive Grant Program, Title IV, Part A, Higher Education Act of 1965, as amended, makes funds available to match state dollars appropriated for grants to needy students. The FY 1974 Iowa allocation, as mentioned previously has been used to strengthen the State of Iowa Scholarship Program.

On behalf of the Commission and the staff, I wish to express our appreciation for the splendid cooperation received from the Iowa educational community. Voluntary services given by many individuals from our Iowa high schools, colleges and universities have contributed significantly to the success of the Commission's programs. A personal and special note of thanks also goes to Pat Conway, Director of Federal Program; Betty Johnson, Assistant for Student Aid Programs; and the entire Commission staff.

Willis Ann Wolff

Acting Executive Director

February 1, 1975

THE HIGHER EDUCATION FACILITIES COMMISSION

Keith S. Noah, Chairman, Representing the General Public, Charles City

Robert H. Kiser, Vice Chairman, Superintendent at Western Iowa Tech, Sioux City

Robert C. Williams, Secretary, Representing the General Public,

History

The State of Iowa Scholarship Program was established in 1965 for the purpose of selecting Iowa's academically outstanding high school graduates and offering scholarship aid, if needed, to attend colleges and universities in their own state. Appropriations for the first ten years of the program have totaled \$2.5 million. These state funds have enabled 3,501 top ranking students to continue their education, providing renewal awards through the sophomore year to those who maintained satisfactory academic progress and continued to need financial aid.

The maximum monetary award is \$610, limited to tuition and mandatory fees at the Iowa institution the student selects. Eligible schools include all two and four-year institutions accredited by the North Central Association of Colleges and Secondary Schools, the public area schools and hospital schools of nursing.

All State of Iowa Scholars receive Certificates of Achievement in recognition of their academic standing. During the 1973-75 biennium, 4,775 State Scholars were named and 1,064 of these students received monetary awards.

A summary of awards over the ten-year history of the program, showing distribution among the different types of institutions, is given in TABLE I. The number and dollar amount of awards at each institution are shown in TABLE II. Distribution of State Scholars and monetary awards by county is given in TABLE III and CHART III-A.

Operation of the Program

A two-phase application procedure is used for selection of State of Iowa Scholarship recipients. Phase one collects applications from high school seniors who rank in the upper 15 percent of their graduation classes and who have taken the American College Tests (ACT) between October of the junior year through October of the senior year.

An academic score, weighted at 60 percent for class rank and 40 percent for ACT scores, is computed for each applicant. All candidates scoring above a certain level, determined annually by the Commission on the basis of the applicant group, are designated as State of Iowa Scholars.

Phase two of the application procedure gives all State of Iowa Scholars an opportunity to compete for monetary awards by filing the Parents' Confidential Statement with College Scholarship Service. College Scholarship Service, a non-profit division of the College Entrance Examination Board, provides a uniform method of analyzing financial need which is widely used by colleges and scholarship agencies throughout the United States. The detailed statement of family income and assets filed by the student and his parents is used as the basis for estimating the amount the family reasonably can be expected to contribute toward college costs. The Higher Education Facilities Commission staff, aided by financial aid officers from Iowa colleges and universities, reviews the need analysis and reserves the right to check reported income figures against the tax returns filed by the applicant and his parents.

All applicants are expected to help pay their college expenses through savings, work or loans. A standard summer earnings expectation of from \$300 to \$600 is added to the estimated contribution expected from the parents. The amount of self-help required is based on the applicant's sex and year in college. The student's "financial need" is the difference between the total family contribution (self-help plus parents' contribution) and the total costs at the college

he plans to attend.

Within the limits of the available funds, monetary scholarships go to the needy candidates in order of their academic rank. Any other scholarships or grants which the student receives must be reported to the Commission, and the State award may be reduced or withdrawn entirely if the student's financial need is being met from other sources.

The academic standing of monetary scholarship recipients for the 1973-75 biennium is shown in TABLE IV. Information on the source and amount of family income, the extent of financial need and the expected parental contribution of monetary recipients is shown in TABLES V - VIII.

State Student Incentive Grant Program

The State of Iowa Scholarship Program was strengthened for the 1974-75 academic year by Federal funds granted to the Commission under the State Student Incentive Grant Program. Although authorized in the Education Amendments of 1972, the SSIGP was funded for the first time in FY 1974 with an appropriation of \$18 million. Each state with a qualified scholarship or grant program based on need received an allotment in direct relationship to its share of the national postsecondary enrollment. The allotment was contingent upon matching funds from state resources. Iowa's share of the SSIGP funding was \$237,372.

Although the Federal funds could have been used for awards under any of the Towa student aid programs, the Commission allocated the bulk of these funds to State of Iowa Scholarships. A primary reason for this decision was the fact that this program offers the student a broad choice of public and private post-secondary institutions in contrast to the other Iowa student assistance programs which are restricted to a single category of institutional choice.

As a result of the SSIGP matching funds, all qualified State Scholars received monetary award offers this year, as compared to less than 50 percent in prior years. In the past, freshman scholarships have averaged about 320 each year. For the 1974-75 year, 625 students received freshman awards and 332 received sophomore renewal awards.

Profile of a Typical State Scholarship Recipient

The typical student receiving monetary aid under this program is exceptionally well-equipped academically for success in college. He ranks in the upper two percent of his high school class and has a composite ACT score of 30 from a possible score of 36. ACT Class Profile Reports show that he was a leader in high school extracurricular activities and that his career goal is most likely to lie in the field of science, education or health, in that order.

Financially, the state scholarship winner needs help from more than one outside source in order to continue his education. He is most likely to come from a family living on a salary or wage (TABLE V), although nearly 25 percent of the scholarship winners come from farm homes. The family income of the average recipient is about \$10,500 (TABLE VI). His parents can afford about \$800 toward his total college costs for the first year, (TABLE VIII). The typical state scholarship student needs around \$1,600 in addition to his parents' contribution (TABLE VII). Through summer work or his own savings, he will manage to add between \$300 and \$400. But he still needs about \$1,200 to meet his college costs. His state scholarship will provide about \$550 (TABLE IX) and the rest must be acquired from other sources—grants, loans or employment during the school year.

History and Evaluation

The Iowa Tuition Grant Program was established in 1969 by the 63rd General Assembly of the Legislature. The grants were designed to give low and middle income students freedom to choose private college education by offering state aid to equalize tuitions at the private and public institutions in Iowa.

The maximum grant of \$1,000 originally paid 76 percent of the average private college tuition and 38 percent of the total costs. Since that time tuitions at both public and private institutions have increased significantly, and the \$1,000 grant now covers only 51 percent of the average private college tuition and 28 percent of the total costs. A growing number of students, especially those in the middle-income category, are finding it impossible to bridge this "need gap" and are declining their grants to attend the lower cost public universities and area schools.

To restore the tuition grant to its original value in relation to college costs, the Commission has recommended that the award maximum be increased to \$1,500 with an annual funding of \$12,963,000

The tuition grant appropriation for the 1973-75 biennium was \$6,000,000 per year, which helped more than 13,000 financially needy lowa students to meet their college costs.

As shown in the six-year summary in TABLE.X, the number of applicants has increased with each year of operation. The Commission received 6,958 applications for tuition grants in 1969, compared to 11,730 for 1974-75 awards. Applications for the 1975-76 year total 12,500. Approximately 90 percent of the applicants need some financial assistance in order to attend their chosen colleges.

The grants, based solely on financial need, are limited to undergraduate Lowa residents enrolled at the 30 eligible private colleges and universities in the state. There is no academic requirement for a grant recipient, other than to maintain satisfactory standing at his college.

A Commission survey of grant recipients for the 1970-71 year indicates that these students are completing their baccalaureate degree requirements and tend to remain in Iowa. Of the 753 persons who returned the survey questionnaire, 93 percent had earned their bachelor's degree, and 96 percent of those who completed college were graduates of Iowa private institutions. Sixty-nine percent were still living in the state. The full report on this study is available at the Commission office.

Operation of the Tuition Grant Program

Application forms are distributed through high school guidance and college financial aid offices. An application must be filed with the Commission by a stated deadline date in January before the academic year in which the grant will be used. For analysis of financial need, each applicant also must file a Parents' Confidential Statement or, if self-supporting, a Student's Financial Statement with College Scholarship Service. This detailed and confidential account of family income and assets is used to estimate how much the applicant and his parents can be expected to contribute toward college costs.

12 %

Applicants are ranked according to the expected contribution, with grants awarded from lowest to highest. The size of a grant depends upon the student's financial need, calculated by deducting his total resources (parental contribution, the student's own self-help through summer earnings and personal assets, and other grant or scholarship awards) from the college budget (tuition and fees, room and board and a standard allowance for additional expenses). No applicant is permitted to receive more gift aid than his financial need analysis indicates is necessary.

Payment of grants is prorated by semester (or other term division at the college) after certification by the college that the student is enrolled and in good standing. Checks made payable to the student are mailed to the college financial aid office. After endorsement by the student, the grant payment is credited to his tuition and fees for the term. The number and dollar amount of grants at each eligible institution is shown in TABLE XI. A comparison of Iowa resident enrollments in relation to the distribution of grant funds at each college is shown in TABLE XII. Distributions by home county in relation to county population are found in TABLE XIII. Distributions by year in college are found in TABLE XIV.

Profile of a Typical Tuition Grant Recipient

The typical recipient of a tuition grant during the 1973-75 biennium came from a family with an annual net income of about \$8,856 (TABLE XV). His or the parents could afford to contribute about \$609 a year toward college expenses (TABLE XVI). Summer earnings added another \$400 to \$600 to the student's resources. But in order to enroll at the college of his or her choice, the typical recipient needed about \$2,360 more (TABLE XVII). After receiving a grant of \$960, the student still needed \$1,400 which had to come from part-time, earnings during the school year, from loans or from other grant and scholarship funds. Commission studies show that students in the \$9,000 to \$12,000 family income range have the greatest difficulty in obtaining this additional aid.

24

IOWA VOCATIONAL-TECHNICAL TUITION GRANT PROGRAM
1973-75

History

This program of need-based grants for career education students at Iowa area schools was established by the 65th General Assembly of the State Legislature. Although the bill was passed in 1973, the program did not become effective until the 1974-75 academic year.

The new program was funded at \$40,000 for the pilot year of operation. Although the law permits a maximum annual grant of \$400, the Commission held awards to \$200 in order that more students might benefit. If future appropriations are sufficient, the full \$400 will be offered to eligible applicants.

The distribution of the 200 grants among the fifteen area schools and their campuses is shown in TABLE XX. The family income ranges of the grant recipients appear in TABLE XXI.

Operation of the Program

Vocational-Technical grants are restricted to Towa residents who enroll in full-time vocational or technical courses of study at the area schools.

In order to be eligible for assistance under this program, a student's course of study must be of at least 12 weeks' duration. Applicants are ranked for priority according to their expected family contribution, as estimated on the basis of the Parents' Confidential Statement (for dependent students) or the Student's Financial Statement (for self-supporting students).

Application forms and instructions are available at all Iowa high school guidance offices and area school financial aid offices. By the deadline date of June 1, the application must be filed with the Higher Education Facilities Commission and the appropriate financial statement with College Scholarship Service. Awards are announced on August 1.

For institutions eligible for participation in this program, see the area school listing on page 4 of the report.

IOWA MEDICAL TUITION LOAN PLAN

History and Evaluation

This program of cancellable loans for medical and osteopathic students was established in 1967 with the objective of encouraging doctors to practice general medicine in Iowa.

A total of \$800,000 was appropriated for loans during the first three bienniums of the program's operation. Funding for the first year of the current biennium was \$95,560, earmarked for renewal of loans already made. No funds were allocated for fiscal year 1975.

As shown in TABLE XXII, 76 percent of the loan funds have gone to osteopathic students, who comprise 56 percent of the borrowers. The high percentage of loan funds for osteopathic students is explained by the higher tuition at the College of Osteopathic Medicine and Surgery in comparison to the tuition at the University of Iowa College of Medicine. The loans were restricted by law to tuition costs.

Of the 256 students who received loans under this program during the seven years of operation, 138 have reached the point of establishing private practice. Thirty-seven of these doctors are now engaged in general practice in Iowa. The remaining 101 doctors have established practice elsewhere or entered a specialized branch of medicine, forfeiting their right to cancellation of their loans.

Twenty-one loans have been repaid in full and another 65 are in the process of repayment. The repaid loans, including accrued interest, revert to the General Fund of the State of Iowa.

The net expenditure of State funds from fiscal year 1968 through 1974 is shown below:

35,939.40

273,070:30

Net cost to the State

\$622,489.70

Operation of the Program

Tuition loans for a maximum of three years of study were available to Iowa resident students in exchange for a contractual agreement to practice general medicine in the State-for at least five years after completion of degree requirements and one year of internship. At the end of five years of Iowa practice, one-half the loan with accrued interest is canceled. An additional ten percent of the original loan amount plus interest charges are canceled at the close of each successive year of Iowa practice. After ten years the entire loan is "forgiven."

If the borrower does not fulfill his agreement, he is required to repay the full amount of the loan at an interest rate of nine percent, accruing from the date of the loan. If the borrower leaves Iowa or enters a specialized branch of medicine before completing the ten years required for full cancellation, he is obligated to repay any uncanceled portion of his loan plus accrued interest.

In the case of a doctor who enters military or public health service before fulfilling his agreement, the first two years of such service is applied toward the five years required for 50 percent cancellation of the debt. An extension on fulfillment of contract also is granted for doctors who enter family practice residencies.

THE CONSTRUCTION GRANTS PROGRAM,

CONSTRUCTION GRANTS PROGRAM

HIGHER EDUCATION FACILITIES ACT OF 1963.

As authorized under Title I, Higher Education Facilities Act of 1963, Federal grants are awarded to eligible institutions of higher education for the construction and equipping of urgently needed undergraduate academic facilities. Facilities eligible for Federal grant aid include classrooms, laboratories, libraries, health care facilities and other related academic facilities. The purchase of land and buildings, as well as the renovation and conversion of existing facilities, is included in the program definition of the term "construction".

Section 103, Title I, Higher Education Facilities Act of 1963, provides for allotments of Federal funds to public community colleges and public technical institutes, which comprise the area community colleges in Iowa.

Section 104 provides for allotments to institutions of higher education other than public community colleges and public technical institutes. The act makes a distinction between these two types in the required criteria for determining relative priorities for Federal share grants. For this reason, the public community colleges and public technical institutes, or area community colleges, are referred to as Section 103 institutions; the Regents universities and the private colleges and universities are referred to as Section 104 institutions.

Eligible Institutions

To qualify for a grant under Title I, an institution must be accredited by a nationally recognized accrediting agency listed by the U. S. Commissioner of Education. If an institution does not meet the accreditation requirement, it may qualify by obtaining a letter of approval from the Office of Education specifying that it meets the requirements set forth in subsection 401 (f) of Public Law 88-204.

Federal Allotments Available

The Federal allotments for the biennium ended June 30, 1974, were as follows:

	,	FY 1973	FY 1974	<u>Total</u>
Section 103 Section 104	•	\$170,288 455,065	. 0 <u>0</u>	\$170,288 455 065
	•	\$625,3513	0	\$625,353

Maximum Federal Shares

Prior to July 1, 1968, the Act allowed a maximum Federal share of 40 percent of the eligible project development cost for Section 103 institutions and 33 1/3 percent of the eligible project development cost for Section 104 institutions. The Higher Education Amendments of 1968. Public Law 90 575, increased the maximum Federal share to 50 percent of the eligible project development cost under each Section effective for all applications received on or after July 1 1968. Accordingly the Iowa Title I State Plan was amended to allow a maximum Federal share of 50 percent of the eligible project development cost or \$500 000, whichever is lesser. However, in the event that all eligible projects for the fiscal year do not exhaust the available funds, the State Plan provides that the remaining funds shall be alloted to all projects receiving less than the maximum Federal share because of the \$500.000 limitation, in order of priority rank, except that no project will receive a Federal share in excess of the maximum permitted by the Act.

Federal Grants Awarded

During the biennium, a total of 15 project applications, including 1 supplemental grant request for previously approved projects, were received and processed. Funds were available to provide one Section 103 grant and one Section 104 grant.

The following grants were awarded during fiscal years 1972 and 1973.

Section 103 Institution	Grant Amount	Closing Date
Des Moines Area Community College (Ankeny)	\$170,288	8/72
Section 104 Institution	•	1
Simpson College	455,065 \$625,353	1/73

Federal Share of Project

50% of the estimated eligible project cost, except that the Federal share shall not exceed \$500,000.

The Commission's Responsibilities

The State Plan provides closing dates of August 31 and January 31 each fiscal year for submission of project applications. The Commission meets after each closing date to set relative priorities and make Federal grant recommendations for the projects. Before doing so, the Commission verifies that the institution and the project proposed in the application appear to meet the basic eligibility requirements set forth in Public Law 88-204 and the regulations governing the administration of that law. The Director presents an analysis of each project application in terms of the Federal regulations and the criteria and Federal share provisions of the Iowa State' Plan. He reports on his visits to the campus concerned

After the Commission sets priorities and makes Federal grant recommendations in accordance with the State Plan, the applications are forwarded to the Regional Office of Education together with recommendations for Federal shares. Upon review and approval of these applications by the Regional Office, the U S. Office of Education reserves Federal funds from the Iowa allotments and offers grant awards to the applicants.

Total Federal Grants Awarded - Fiscal Years 1965-1974

A total of 86 projects have been funded to date under the Construction Grants Program. Forty-four Iowa institutions have shared in Federal grant awards totaling \$29,599,475 for the construction or renovation of academic buildings and utility systems. The Regents institutions received \$9,431,247 or 31.9 percent of the total awards; the private colleges received \$11,563,022 or 39.0 percent of the total awards; and the area community colleges received \$8,605,206 or 29.1 percent of the total awards.

THE EQUIPMENT GRANTS PROGRAM

THE EQUIPMENT GRANTS PROGRAM

TITLE VI, PART A OF THE

HIGHER EDUCATION ACT OF 1965

Title VI, Part A, of Public Law 89-329, Higher Education Act of 1965, provides financial assistance for the improvement of undergraduate classroom instruction in selected subject areas at institutions of higher learning. Under this Act, the Federal government appropriates funds to provide matching grants to eligible institutions for the acquisition of instructional equipment. Federal funds are made available under two categories: "for laboratory and other special equipment and materials (Category I)" and "for television equipment and materials for closed-circuit direct instruction (Category II)". Costs for directly associated minor remodeling to more effectively utilize the equipment are eligible under each Category.

Institutional Eligibility

To qualify for a grant under Title VI; Part A, an institution must be accredited by a nationally recognized accrediting agency listed by the U. S. Commissioner of Education pursuant to subsection 401 (f) of Public Law 88-204. If an institution does not meet the accreditation requirement, it may qualify by obtaining a letter of approval from the Office of Education specifying that it meets the requirements set forth in subsection 401 (f) of Public Law 88-204. The approval letter must be dated no earlier than two years prior to the date of application. Institutions

which need USOE approval should contact:

Accreditation and Institutional Eligibility Officer Bureau of Higher Education U. S. Office of Education 400 Maryland Avenue, S.W. Washington, D.C. 20202

Federal Allotments

A total of \$360,528 was allotted for this biennium. This includes \$317,265 for Category I items (laboratory and other special equipment and materials) and \$43,263 for Category II items (television equipment and materials for closed-circuit direct instruction).

Maximum Federal Shares

Title VI , Part A, of the Higher Education Act of 1965 provides for a maximum Federal share of 50 percent of the eligible project cost under each category.

Because the requests for Federal grant aid greatly exceed the funds allotted for Iowa institutions each year, the Title VI-A State Plan of 1972, provided for an initial calculated Federal share of \$12,000 for Category I projects and \$5,000 for Category II projects. However, if unallocated funds still remain in the State allotment after a given closing date, these funds are apportioned equally among projects which received a recommended share of less than 50 percent because of the \$12,000 and \$5,000 limitations. No project may receive a Federal share in excess of 50 percent, nor may unused funds be transferred between categories.

Grants Awarded

The State Plan for Title VI-A specifies November 30 as the only closing date for submission of applications each fiscal year. For the November 30,

1972 closing date, 34 Category I applications and 15 Category II applications were received and processed. For the November 30, 1973 closing date, 35 Category I applications and 23 Category II applications were processed. A total of 23 grants were recommended for the 1972 closing date and 22 for the 1973 closing date. (See listing of project grants on pages 64-67.)

State Plan Criteria for Establishing Priorities

... Title VI-A specifies that the State Plan shall set forth separately the standards and methods for determining the relative priorities of cligible projects for Category I and Category II equipment and materials.

The criteria used in the Iowa State Plan for determining point allowance for eligible projects in each of the categories are as follows:

<u>C</u>	Category I - Laboratory and Other Special Equipment	2 2	Maximum Points,
1	Basic educational & general expenditures per semester		,
•	credit hour equivalent	· · · ·	25
2	. Percentage of equipment & materials to be placed in	,	·
	existing facilities	• • •	_ 20
3	. Capacity/enrollent ratio		10
. 4	. Average weekly room period use of laboratories and shops		10
5	Percentage of full time students to benefit from		
	acquisition of project items		5′
6.	Cumulative amount of previous grants		. 15
,	Date of most recent previous grant	· · ·	15 100
Ca	ategory II - Closed-Circuit Instructional Television		•
1.	Basic educational & general expenditures per semester credit hour equivalent	•	· , 25
,			, 23
2.	Additional courses to be programmed as a result of items in project		20 ,
3.	Projected additional student enrollment		15
4.	Capacity/enrollment ratio		10
5.	Cumulative amount of previous grants		. 15.
6.	Date of most recent previous grant		15
	·· · · · · · · · · · · · · · · · · · ·		100

The Commission's Responsibilities

The Commission staff works closely with the applicant institutions in preparing the project applications. After each closing date, the projects are reviewed, priorities are set, and Federal shares determined by the Commission members. After priorities have been assigned, the applications are forwarded directly to the U.S. Office of Education with the Commission's recommendation for Federal shares.

Total Federal Shares Awarded - Fiscal Years 1966 - 1974

The private colleges and universities have received grant shares totaling \$765,954 or 45.1 percent of all funds awarded to date; the area community colleges have received \$752,988 or 44.3 percent; the Regents institutions have received \$134,689 or 7.9 percent; combinations of institutions have received \$36,000 or 2.2 percent; and institutions of specialized education have received \$9,179 or 0.5 percent.

The following listing shows total project costs and grant amounts awarded, and the type of equipment or major subject field for which equipment and materials have been acquired under Title VI-A to date:

A total of \$1,698,810 has been allocated to Iowa since the beginning of the equipment grants program from fiscal 1966 through fiscal 1974. Due to reductions in the original project costs by some grant recipients, the net amount spent or obligated to date is \$53,893 less than the total amount allotted. The table below shows the Federal funds allotted in each fiscal year and the net amount of grant funds utilized.

The \$53,893 of unused funds, not available for redistribution, has reverted

REVISION OF THE IOWA STATE PLAN FOR TITLE VI-A

During the Summer of 1974, the Commission reviewed the Iowa State Plan for Title VI-A. One of the revisions in the State Plan was the reduction in the amount of the maximum federal grant for Category I from \$12,000 to \$10,000. The criteria for priorit rankings were also reviewed for their effectiveness. One outcome of the review was the decision to assign a single set of criteria for rankings of both Categories of applications. Beginning with the November 30, 1974 closing date, applications for the Title VI-A program were processed under the new guidelines.

The State of Iowa was allotted \$113,518 for grants for FY 1975. A total of sixty-two applications were received and processed by the Commission. The funding level will provide grants for eleven Category I projects and six Category II projects.

*Due to the delayed release of the impounded funds for both FY 1973 and 1974, the utilization of these funds cannot be determined at this point in time.

COMPREHENSIVE PLANNING GRANTS PROGRAM

COMPREHENSIVE PLANNING GRANTS PROGRAM

The Higher Education Amendments Act of 1966 included provisions for grant allocations to State Commissions for the purpose of conducting statewide comprehensive facilities planning studies. The original purpose of the Comprehensive Planning Grants Program was to encourage wise use of the limited institutional, local, state, private, and Federal funds available for construction of higher education facilities.

The Education Amendments of 1972 broadened the scope of these study projects to include statewide planning for all public and private postsecondary resources in the State, "including planning necessary for such resources to be better coordinated, improved, expanded or altered so that all persons within the State who desire, and who can benefit from, postsecondary education may have an opportunity to do so."

The 1972 Amendments, Part L, Section 1202, also stipulated that "any State desiring to receive assistance under Section 1203 or Title X must establish a State Commission or designate an existing State agency which is broadly and equitably representative of the general public and public and private nonprofit and proprietary institutions of postsecondary education in the State"

States were permitted but not required to assign their "1202 commissions" responsibility for the community service and continuing education grants, the instructional equipment grants and the construction grants.

In April 1974, Governor Robert D. Ray designated the Iowa Higher Education Facilities Commission as the Iowa "1202 Commission," stipulating that this agency would continue to administer the equipment and construction grants.

The Comprehensive Planning Studies completed to date include the following:

- Cresap, McCormick and Paget. An Enrollment Projection Study. Des Moines, Iowa: Higher Education Facilities Commission of the State of Iowa.

 August, 1968. 88,p.
- Ernst and Ernst. Questionnaire for A Survey of Physical Facilities at Colleges and Universities in Iowa. Des Moines, Iowa: Higher Education Facilities Commission of the State of Iowa. March, 1968. 40 p.
- Ernst and Ernst. A Survey of Physical Facilities at Colleges and Universities in Iowa. Des Moines, Iowa: Higher Education Facilities Commission of the State of Iowa, 1969. 173 p.

STATE OF IOWA SCHOLARSHIP, LAW

Acts of the 61st G.A., 1965 Session; Chapter 9, S.F. 577

Section 1. Chapter nine (9) of the Acts of the Extraordinary Session of the Sixtieth General Assembly is amended by adding to section two (2) the following paragraph:

"4. Prepare and administer a state plan for state supported and administered scholarship program. Said state plan shall provide for scholarships based on ability and need to deserving students of Iowa, matriculating in Iowa universities or colleges."

Sec. 2. There is hereby appropriated from the general fund of the state of Iowa, for the biennium beginning July 1, 1965, and ending June 30, 1967, to the higher education facilities commission, the sum of five hundred thousand (500,000) dollars, or so much thereof as may be necessary, to finance the scholarships awarded by the higher education facilities commission.

Sec. 3. Chapter eight (8), Code 1962, shall apply to this Act, except that section eight point five (8.5), Code 1962, shall not be applicable.

IOWA TUITION GRANT LAW

Acts of the 63rd G.A., Chapter 178, S.F. 295

- Section 1. When used in this Act, unless the context otherwise requires:
- 1. "Tuition grant" means an award by the state of Iowa to a qualified student under this Act.
- 2. "Financial need" means the difference between the student's financial resources available, including those available from his parents as determined by a completed parents' confidential statement, and the student's anticipated expenses while attending the accredited private institution. Financial need shall be redetermined at least annually.
- 3. "Full time resident student" means an individual resident of Iowa who is enrolled at an accredited private institution in a course of study including at least twelve semester hours or the trimester equivalent of twelve semester hours. "Course of study" does not include correspondence courses.
- 4. "Qualified student" means a full-time resident student who established financial need and who is making satisfactory progress toward graduation.
- 5. "Accredited private institution" means an institution of higher learning located in Iowa which is operated privately and not controlled or administered by any state agency or any subdivision of the state and
- (a) which is accredited by the North Central Association of Colleges and Secondary Schools accrediting agency based on their requirements as of April 1, 1969, or
- (b) which has been certified by the North Central Association of Celleges and Secondary Schools accrediting agency based on their requirements as of April 1, 1969 (1) as a candidate for accreditation by such agency or (2) as a school giving satisfactory assurance that it has the potential for accreditation and is making progress which, if continued, will result in its achieving accreditation by such agency within a reasonable time, or
 - (c) which has received letters from A least three lowa institutions accredited

by the North Central Association of Colleges and Secondary Schools accrediting agency based on their requirements as of April 1, 1969 stating that its credits are and have been accepted as if earned in an institution so accredited.

- 6. "Commission" means the higher education facilities commission.
- Sec. 2. A tuition grant may be awarded to any resident of Iowa who is admitted, and in attendance as a full-time resident student at any accredited private institution and who establishes financial need.
- Sec. 3. A qualified student may receive tuition grants for not more than eight semesters of undergraduate study or the trimester equivalent.
- Sec. 4. The amount of a tuition grant to a qualified student for the fall and spring semesters, or the trimester equivalent, shall be the amount of his financial need for that period. However, a tuition grant shall not exceed the lesser of:
- 1. The total tuition and mandatory fees for that student for two semesters or the trimester equivalent, less the base amount determined annually by the Higher Education Facilities Commission, which base amount shall be within ten dollars of the average tuition for two semesters or the trimester equivalent of undergraduate study at the state universities under the Board of Regents, but in any event the base amount shall not be less than four hundred dollars; or
 - 2. One thousand dollars.
- Sec. 5. A tuition grant may be made annually for both the fall and spring semesters or the trimester equivalent. Payments under the grant shall be allocated equally among the semesters or trimesters and shall be paid at the beginning of each semester or trimester upon certification by the accredited private institution that the student is admitted and in attendance. If the student discontinues attendance before the end of any semester or trimester after receiving payment under the grant, the entire amount of any refund due that student, up to the amount of any payments made under the annual grant, shall be paid by the accredited private institution to the state.

- Sec. 6. If a student receives financial aid under any other program, the full amount of such financial aid shall be considered part of the student's financial resources available in determining the amount of his financial need for that period. In no case may the state's total financial contribution to the student's education, including financial aid under any other state program, exceed the tuition and mandatory fees at the institution which he attends.
- Sec. 7. The higher education facilities commission shall administer this program and shall:
 - 1. Provide application forms and parents' confidential statement forms.
- 2. Adopt rules and regulations for determining financial need, defining tuition and mandatory fees, defining residence for the purposes of this Act, processing and approving applications for tuition grants, and determining priority of grants. The commission may provide for proration of funds if the available funds are insufficient to pay all approved grants. Such proration shall take primary account of the financial need of the applicant. In determining who is a resident of lowa, the commission's rules shall be at least as restrictive as those of the board of regents.
 - 3. Approve and award tuition grant's.
- 4. Make an annual report to the governor and general assembly, and evaluate the tuition grant program for the period. The commission may require the accredited private institution to promptly furnish any information which the commission may request in connection with the tuition grant program.
- Sec. 8. Each applicant, in accordance with the rules and regulations of the commission, shall:
 - 1. Complete and file an application for a tuition grant.
- 2. Be responsible for the submission of the parents' confidential statement for processing, the processed information to be returned both to the commission and to the college in which he is enrolling.
 - 3. Report promptly to the commission any information requested.
 - 4. File a new application and parents' confidential statement annually on the

basis of which his eligibility for a renewed tuition grant will be evaluated and determined.

Sec: 9. Section seventeen point four (17.4), Code 1966, is amended by adding at the end thereof:

"Higher education facilities commission."

Sec. 10. Section two hundred sixty-one point two (261.2), Code 1966, is amended by adding the following new subsection:

"Administer the tuition grant program under this Act."

Acts of the 65th G.A.; 1973 Session, Chapter 101, H.F. 682

SEC. 2. Chapter two hundred sixty-one (261), Code 1973, is amended by adding the following new section:

NEW SECTION. Vocational-technical tuition grants:

- 1. A vocational-technical tuition grant may be awarded to any resident of Iowa who is admitted and in attendance as a full-time student in a vocational-technical program at an area school in the state, and who establishes financial need.
- or than four semesters, eight quarters or the equivalent of two full years of study.
- 3. The amount of a vocational-technical tuition grant shall not exceed the lesser of four hundred dollars per year or the amount of the student's established financial need.
- 4. A vocational-technical tuition grant shall be awarded on an annual basis, requiring reapplication by the student for each year. Payments under the grant shall be allocated equally among the semesters or quarters of the year upon certification by the institution that the student is in full-time attendance in a vocational-technical program, as defined under rules of the department of public instruction. If the student discontinues attendance before the end of any term after receiving payment of the grant, the entire amount of any refund due that student, up to the amount of any payments made under the annual grant, shall be paid by the institution to the state.
- 5. If a student receives financial aid under any other program, the full amount of that financial aid shall be considered part of the student's financial resources available in determining the amount of his financial need for that period.
- 6. The higher education facilities commission shall administer this program and shall:
- a. Provide application forms for distribution to students by Iowa high schools and area schools.
- b. Adopt rules and regulations for determining financial need, defining residence for the purposes of this Act, processing and approving applications for grants and determining priority for grants.
 - c. Approve and award grants on an annual basis.
 - d. Make an annual report to the governor and general assembly.
- 7. Each applicant, in accordance with the rules and regulations established by the commission, shall:
 - a. Complete and file an application for a vocational-technical tuition grant.
- b. Be responsible for the submission of the financial information required for evaluation of his need for a grant, on forms determined by the commission.
 - c. Report promptly to the commission any information requested.
- d. Submit a new application and financial statement for reevaluation of his eligibility to receive a second-year renewal of the grant.
